Md. Moinul Islam Sajid

Software Engineer and Researcher

House-35, Road-14, Nikunja-2, Khilkhet, Dhaka-1229

+880-1872223605 | moinulislamsajid107@gmail.com | Md. Moinul Islam Sajid

Professional Summary

Results-driven Computer Science and Engineering graduate with an exceptional CGPA of 3.99/4.00, a strong foundation in programming, data structures, algorithms, and problem-solving, and research expertise in deep learning, computer vision, image processing, and Explainable AI (XAI).Experienced in algorithmic problem-solving through Codeforces, LeetCode, and HackerRank, with proficiency in C, C++, Python, and Java. Passionate about advancing research, delivering effective academic instruction, and developing innovative software solutions through analytical thinking, technical proficiency, and continuous professional development.

Education

Dhaka International University *July 2022 – August 2026*
Bachelor of Science in Computer Science & Engineering Dhaka, Bangladesh

- CGPA: 3.99/4.00 **(Class Rank: 1st)**
- **Relevant Coursework:** Data Structures, Algorithm Design and Analysis, Artificial Intelligence and Neural Networks, Image Processing, DBMS, Software Engineering, OOP.

Govt. Yeasin College, Faridpur *July 2019 – December 2021*
Higher Secondary Certificate Faridpur, Bangladesh

- GPA: 4.92/5.00

Learning and Research Experience

2022–2023 W3Schools
C and Python Programming
Studied C and Python fundamentals, practised programming problems, and completed academic projects including Library Management and Hospital Management systems.
Skills: C, Python, Programming Fundamentals

2023–2024 Codecademy
Java and Data Structures & Algorithms
Developed foundational knowledge of Java, OOP, algorithm design, and problem-solving; practised data structures, searching, and sorting.
Skills: Java, DSA, Searching, Sorting, Stack, Queue, Binary Search Tree

Mid-2024 – September 2025 Phitron
Competitive Programming
Practised competitive programming and algorithmic problem-solving; solved 1,500+ problems across Codeforces, LeetCode, HackerRank, and other online judges.
Skills: C++, Data Structures, Algorithms, Competitive Programming

October 2025 – Present Dhaka International University
Researcher
Conducting academic research in deep learning, computer vision, medical image analysis, and plant disease classification. Three conference papers have been accepted, with additional journal manuscripts under review or in preparation.
Skills: Python, Computer Vision, Image Processing, Keras, NumPy, Pandas

Publications

Conference Papers

Enhancing Brain Tumor Diagnosis with Deep Convolutional Networks: A Comprehensive Comparison and Explainable AI Insights on Multimodal Data
International Conference on Electrical, Computer and Communication Technologies *May 2026*

Deep Learning-Based Brain Tumor Segmentation and Area Quantification Using Multimodal Images
International Conference on Electrical, Computer and Communication Technologies *May 2026*

Machine Learning-Based Classification of Student Satisfaction with Internet Service Quality in Public and Private Universities of Bangladesh
International Conference on Electrical Engineering and Information & Communication Technology *January 2027*

Journal Articles

Background Shortcuts in Plant-Disease Image Classification: A Diagnosis and Partial Remedy
Manuscript under review *2026*

LeafMetaNet: A Leakage-Aware Metadata-Assisted Deep Feature Fusion Framework for Multi-Crop Plant Disease Classification
Manuscript under review *2026*

A Failure-Aware and Confidence-Guided Framework for Reliable Rice Leaf Disease Classification Using Deep Learning and Explainable AI
Manuscript under review *2026*

AgroMind-XAI: Investigating and Mitigating Shortcut Learning in Multi-Domain Plant Disease Diagnosis through Metadata-Guided Invariant Representation Learning
Manuscript under preparation *2026*

An Explainable Hybrid Deep Learning Framework for Multi-Class Potato Leaf Disease Classification
Manuscript under review *2026*

Thesis Book

From Data Quality to Trustworthiness: A Multi-Dimensional Framework for Reliable Plant Disease Diagnosis
Thesis Book *2026*

Datasets

GuavaLeaf-BD: A High-Resolution Multi-View Leaf-Only Disease Image Dataset for Guava (*Psidium guajava*) from Bangladesh
Submission Under review *2026*

Projects

A6AI – AI-Powered Personalized E-commerce Website
Technologies: HTML, CSS, JavaScript, Node.js, React.js, Vite, Tailwind CSS
Developed an AI-powered e-commerce website featuring voice, text, and image search, shopping cart, wishlist, and a responsive user interface.
Repository: View Project on GitHub

Raw code projects on Java and C++
Technologies: C++, Java, Swing, OOP, DSA
Developed C++ and Java projects using OOP, data structures, and problem-solving techniques. Built Java desktop applications with Swing and AWT, implementing interactive GUIs and event handling.
Repository:

- View Java Projects on GitHub
- View C++ Projects on GitHub

Technical Skills

- **Programming Languages:** C, C++, Python, Java, JavaScript
- **Data Structures and Algorithms:** Stack, Queue, Trees, Binary Search Trees, Searching, Sorting, Algorithmic Problem-Solving
- **AI and Research:** Deep Learning, Computer Vision, Image Processing, Explainable AI, Plant Disease Classification, Medical Image Analysis
- **Libraries and Tools:** Keras, NumPy, Pandas
- **Web Development:** HTML, CSS, JavaScript, React.js, Node.js, Vite, Tailwind CSS
- **Research:** Academic Writing, Experimental Evaluation, Research Manuscript Preparation
